

BANANA

Water:

Let soil barely dry on surface in between thorough soakings. Good drainage is essential. Never allow roots to stand in water. Fertilize monthly, March through October, with an all purpose houseplant fertilizer. Wash leaves frequently.

Light:

Bright light - a few hours of direct sun is beneficial. Can acclimate to filtered sun outdoors during spring and summer.

Repotting:

Repot in spring or summer, if necessary.

If you don't see it, please ask ~ We special order.
